

Graphene and graphene-based nanostructures

Guest Editors: I.V. Krive, V.M. Loktev, and R.I. Shekhter

Содержание

Preface	991
-------------------	-----

Graphene and graphite multilayers

Gusynin V.P., Miransky V.A., Sharapov S.G., and Shovkovy I.A. Edge states in quantum Hall effect in graphene (Review Article)	993
Gorbar E.V., Gusynin V.P., and Miransky V.A. Toward theory of quantum Hall effect in graphene	1007
Mikitik G.P. and Sharlai Yu.V. The Berry phase in graphene and graphite multilayers	1012
Dóra B. Disorder effect on the density of states in Landau quantized graphene	1020
Kumazaki H. and Hirashima D.S. Tight-binding study of nonmagnetic-defect-induced magnetism in graphene	1025
Suprunenko Y.F., Gorbar E.V., Sharapov S.G., and Loktev V.M. Effect of next-to-nearest neighbor hopping on electronic properties of graphene	1033
Skrypnyk Yu.V. and Loktev V.M. Spectral function of graphene with short-range impurity centers	1040
Sitenko Yu.A. and Vlasii N.D. Vacuum polarization in graphene with a topological defect	1049

Carbon nanotubes, quantum wires and Luttinger liquid

Dittmer S., Mudgal S., Nerushev O.A., and Campbell E.E.B. Local heating method for growth of aligned carbon nanotubes at low ambient temperature	1058
Kornyushin Yu. Semiclassical approach to the description of the basic properties of nanoobjects	1063
Gumen L.N. and Krokhin A.A. Index of refraction of a photonic crystal of carbon nanotubes and homogenization of optically anisotropic periodic composites	1072
Nogaret A., Portal J.-C., Beere H.E., Ritchie D.A., and Phillips C. Microwave induced forward scattering and Luttinger liquid interferences in magnetically confined quantum wires	1081
Skorobat'ko G.A. and Krive I.V. Luttinger liquid and polaronic effects in electron transport through a molecular transistor	1086
Chaplik A.V., Magarill L.I., and Vitlina R.Z. Electrostatic screening and Friedel oscillations in semiconducting nanotubes	1094
Romanovsky I.A., Bogachek E.N., Krive I.V., and Landman U. Giant magnetization of a superconductor–two-dimensional electron gas–superconductor structure	1098
