

Low-temperature radiation effects and surface phenomena in wide-bandgap materials

Guest editors: A. I. Popov and N. V. Krainyukova

<i>Preface</i>	1351
<i>Andris Antuzevics</i> EPR characterization of erbium in glasses and glass ceramics	1353
<i>N. Mironova-Ulmane, A. I. Popov, G. Krieke, A. Antuzevics, V. Skvortsova, E. Elsts, and A. Sarakovskis</i> Low-temperature studies of Cr ³⁺ ions in natural and neutron-irradiated Mg-Al spinel	1359
<i>S. Piskunov, I. Isakoviča, M. Putnina, and A. I. Popov</i> <i>Ab initio</i> calculations of the electronic structure for Mn ²⁺ -doped YAlO ₃ crystals	1365
<i>N. Zhanturina, L. Myasnikova, K. Shunkeyev, A. Maratova, and A. I. Popov</i> Efficiency of H center stabilization in alkali halide crystals at low-temperature uniaxial deformation	1371
<i>V. O. Hamalii, A. V. Peschanskii, A. I. Popov, and N. V. Krainyukova</i> Intrinsic nanostructures on the (001) surface of strontium titanate at low temperatures	1377
<i>A. P. Kozlova, O. A. Buzanov, V. Pankratova, and V. Pankratov</i> Low-temperature luminescence of catangasite single crystals under excitation by vacuum ultraviolet synchrotron radiation	1386
<i>L. L. Rusevich, E. A. Kotomin, G. Zvejniaks, and A. I. Popov</i> <i>Ab initio</i> calculations of structural, electronic and vibrational properties of BaTiO ₃ and SrTiO ₃ perovskite crystals with oxygen vacancies	1394
<i>Viktorija Pankratova, Juris Purans, and Vladimir Pankratov</i> Low-temperature luminescence of ScF ₃ single crystals under excitation by VUV synchrotron radiation	1407
<i>G. Bakradze, A. Kalinko, and A. Kuzmin</i> X-ray absorption and Raman spectroscopy studies of tungstates solid solutions Zn _c Ni _{1-c} WO ₄ (<i>c</i> = 0.0–1.0)	1412
<i>R. Eglitis, A. I. Popov, J. Purans, and Ran Jia</i> First principles hybrid Hartree–Fock–DFT calculations of bulk and (001) surface <i>F</i> centers in oxide perovskites and alkaline-earth fluorides	1418
<i>I. Karbovnyk, V. Pankratov, S. Velgosh, I. Bolesta, R. Lys, I. Kityk, H. Klym, I. Makarenko, V. Pankratova, and A. I. Popov</i> Low-temperature luminescence of CdI ₂ under synchrotron radiation	1426
<i>Alexei Kuzmin</i> First-principles LCAO study of the low- and room-temperature phases of CdPS ₃	1430
<i>A. V. Peschanskii, A. Yu. Glamazda, and I. A. Gudim</i> Spectroscopic study of the TbAl ₃ (BO ₃) ₄ single crystal: Raman and luminescence spectroscopy	1437
<i>I. Karbovnyk, H. Klym, S. Piskunov, A. A. Popov, D. Chalyy, I. Zhydenko, and D. Lukashevych</i> The impact of temperature on electrical properties of polymer-based nanocomposites	1445
<i>L. Lisitsyna, A. I. Popov, and Zh. T. Karipbayev</i> Temperature dependence of luminescence of LiF crystals doped with different metal oxides	1450
